

# Model 2-0G

# BRAMIDAN®

Problem-free binding system ensures that the bale can be easily bound.

The supplied bale trolley eases baling and subsequent transport of the bale.

## Rational handling of waste - where space is limited

The Little Green One is useful for smaller retail shops and companies with a limited amount of packaging waste. Alternatively it can be used by larger companies sorting both cardboard and plastic and where a second, but smaller machine is needed.

The 2-0G is the smallest and least expensive press. With a base area of only 70 x 90 cm it is easy to locate and the filling opening is relatively large on this mini machine 50 x 70 cm.

The press chamber is very spacious, and the machine is probably the largest mini press on the market.

## Technical specifications

Model	2-0G
Press force (t)	4
Electricity/kW*	3x230/400V 16A 2.2 kW
Cycle time (sec)	18
Dimensions LxWxH (mm)	870 x 640 x 2250
Filling opening (mm)	700 x 490
Filling height (mm)	770
Press chamber height (mm)	1150
Stroke (mm)	750
Weight/kg	420
Bale size LxWxH (mm)	700 x 500 x 700
Bale weight/kg cardboard	40 - 60
Bale weight/kg plastic	40 - 80
Noise level, dB	75 - 79
* 1 x 230 V available
