

Model 4-K

BRAMIDAN®

A strong safety lock ensures that the door opening is gradual.

Strong press plate with wide grooves for problem-free binding.

A classical Bramidan bale press

The 4-K is suitable for medium sized retail shops and industrial companies with standard sized cardboard boxes.

The machine is characterised by a large filling opening, a long stroke and an effective system with fixed lathes in both the front and back door.

Maintenance costs are low, and the compact design ensures that the machine can easily be transported and installed.

Technical specifications

Model	4-K
